

CORONTINE.... By the students of BCS (Quarantine during corona)

Head Girl

"There is a fear among millions today, and we have to solve this fear."

As we all know, COVID-19 or Corona viruses are a group of related viruses that cause diseases in mammals and birds. In humans, corona viruses cause respiratory tract infections that can range from mild to lethal. Moreover, there are yet to be vaccines or antiviral drugs to prevent or treat human corona virus infections. From reliable resources I got to know that the outbreak was identified in Wuhan, China, in December 2019. The World Health Organization declared the outbreak to be a Public Health Emergency of International Concern on 30 January 2020, and recognized it as a pandemic on 11 March 2020. I observed that the economic impact of the 2019–20 corona virus pandemic in India has been hugely disruptive as The World Bank and credit rating agencies have downgraded India's growth for fiscal year 2021 with the lowest figures India has seen in three decades since India's economic liberalization in the 1990s.

Virus is primarily spread between people during close contact, often via small droplets produced by coughing, sneezing, or talking. The virus can survive on surfaces for up to 72 hours. It is most contagious during the first three days after the onset of symptoms.

Being an aware citizen, I highly recommend you all to take preventive measures that include hand washing, covering one's mouth when coughing, maintaining distance from other people, monitoring and self-isolation for people who suspect they are infected.

Thank You
Bhumika Dalal

Head Boy

In December 2019, I came to know about a new deadly virus that is a novel corona virus called SARS-COV-2 which has resulted in the outbreak of respiratory illness known as COVID-19. When I was gathering the information about this deadly virus I came to know that the person who have symptoms like cough, fever and having difficulty in breathing may have the chances that he or she is affected by the corona virus, but as I had researched about the prevention of this disease I found that we can protect ourselves by washing our hands frequently, avoiding touching our face and avoiding close contact with the people who are unwell or in the other way I can say that we have to maintain social distancing to prevent it.

Indian government have also taken many other steps to help the citizens of our country as millions of workers are losing their jobs so, the government is providing food, money and government has also announced the Aadhar package in order to help poor and needy people, But inspite of all these problems the government wants only one thing from us that is to stay at home. so, I request all the citizens of the country to stay safe at home.

Thank You
Aryansh Jain

COVID-19

PREVENTION

Do's

- ✓ Wash your hands frequently for 20+ seconds with soap and water.
- ✓ Stay at home and limit contact with others.
- ✓ Routinely clean frequently touched spaces in your home.
- ✓ Seek medical help if you're suffering from flu.
- ✓ Limit contact with pets and animals.
- ✓ Always wear mask while going outside.

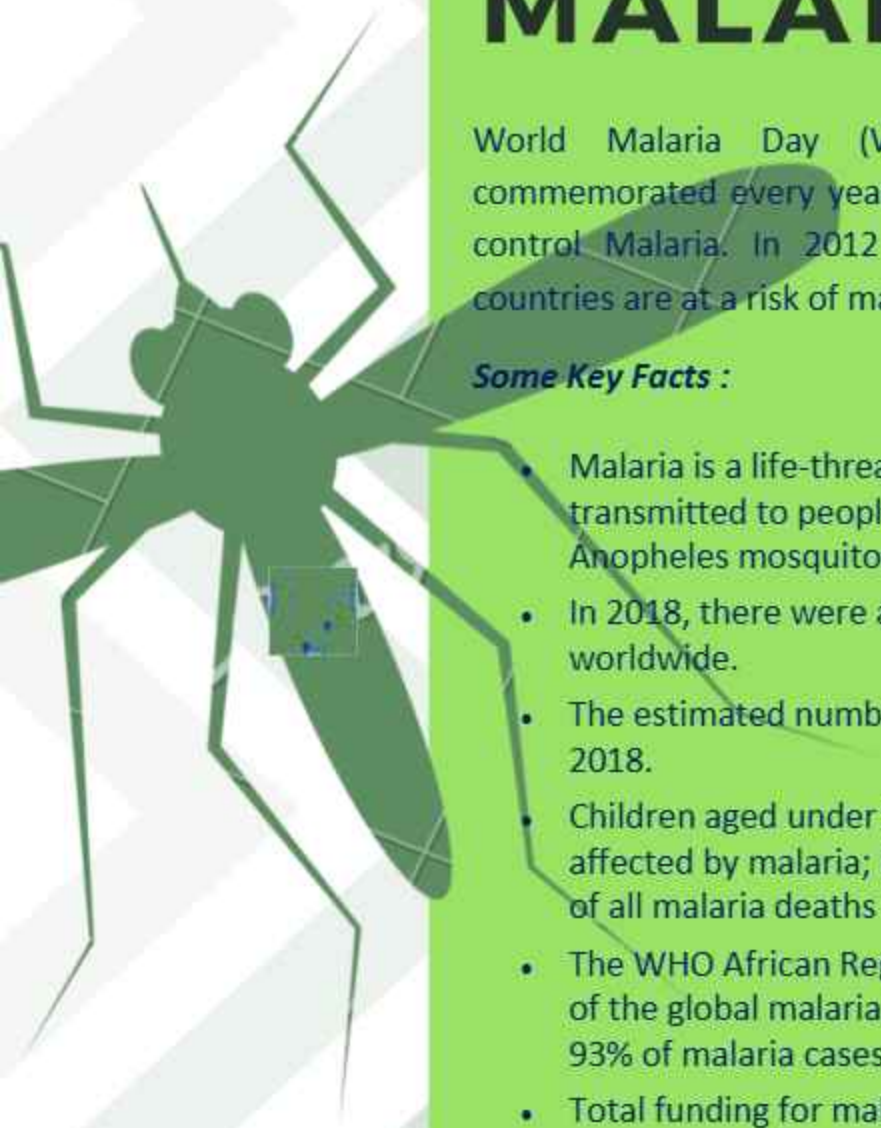

Don'ts

- ✓ Don't go to crowded areas.
- ✓ Don't touch your face.
- ✓ Don't be in close contact with others.
- ✓ Don't ignore symptoms.
- ✓ Don't leave your home, especially if you're sick.
- ✓ Avoid handshake.

WORLD MALARIA DAY

World Malaria Day (WMD) is an international observance commemorated every year on 25 April & recognizes global efforts to control Malaria. In 2012 malaria, globally 3.3 Billion people 106 countries are at a risk of malaria.

Some Key Facts :

- Malaria is a life-threatening disease caused by parasites that are transmitted to people through the bites of infected female Anopheles mosquitoes. It is preventable and curable.
- In 2018, there were an estimated 228 million cases of malaria worldwide.
- The estimated number of malaria deaths stood at 405 000 in 2018.
- Children aged under 5 years are the most vulnerable group affected by malaria; in 2018, they accounted for 67% (272 000) of all malaria deaths worldwide.
- The WHO African Region carries a disproportionately high share of the global malaria burden. In 2018, the region was home to 93% of malaria cases and 94% of malaria deaths.
- Total funding for malaria control and elimination reached an estimated US$ 2.7 billion in 2018. Contributions from governments of endemic countries amounted to US$ 900 million, representing 30% of total funding.

World Malaria Day gives people the chance to promote or learn about the efforts made to prevent and reduce Malaria around the world. Organizations, such as the World Health Organization (WHO) which is the United Nations' (UN) directing and coordinating authority for health actively play a role in promoting and supporting World Malaria Day. The activities and events that take place on or around World Malaria Day are often joint efforts between Governments, on-Government organizations, communities and individuals.

Amazing as it is, there is indeed a full day dedicated to Safety and Health at Work! The World Day for Safety and Health at Work is an annual international campaign to promote safe, healthy and decent working environment. It is held every year on 28 April and has been observed by the International Labor Organization (ILO) since 2003. The ILO observes this with an objective to promote the prevention of occupational accidents and diseases globally. It's purpose is to also organize awareness campaigns on this day. Basically, it focuses on international attention on emerging trends in the field of occupational safety and health. Programs focusing on health issues on the workplace, safety measures etc. are broadcasted.

Every day people spend most of their time in the organization where they work to earn money. It is therefore very important to maintain healthy standards at workplace so that any kind of mishappening, work related injury etc. can be avoided. It is therefore to create awareness among people, this World Day for Safety and Health at Work is celebrated.

Now, let us see why is this important to any country??

The main objective is to focus international attention on the magnitude of the problem and to promote healthy work culture so that several work-related deaths and injuries can be reduced and avoided.

Each of us is responsible for stopping deaths and injuries on the job.

As employers we are responsible for ensuring that the working environment is safe and healthy. As workers we are responsible to work safely and to protect ourselves and not to endanger others, to know our rights and to participate in the implementation of preventive measures.

So, on this day, we should also stand together and participate in the events to create awareness among people regarding health and safety measures necessary at workplace to make environment healthy and positive.

FUN & ENTERTAINEMT CORNER

COFFEE AND A FLY

A customer ordered a cup of coffee in a restaurant. The waiter served the coffee. The customer found a fly in the coffee. He called the waiter.

Customer: How do I drink this coffee?

Waiter: Don't you know how to drink a coffee?

Customer: Waiter, see, there is a fly in my coffee.

Waiter: Oh yes sir, you are right! There is a fly in your coffee.

Customer: Waiter, I said, there is a fly in my coffee (He stressed on the word MY)

Waiter: Oh don't worry sir, the fly won't drink much.

Customer: Waiter, it is swimming in my coffee.

Waiter: Sir, do you want me to get a lifeguard for the fly sir?

(Annoyed) **Customer:** the fly is dead, its irritating.

Waiter: I guess, it doesn't know how to swim properly.

Customer: How do I drink this coffee?

Waiter: Don't you know how to drink? I will teach you!

He drank the coffee! And said, this is how you should drink a coffee.

STATION MASTER AND A LADY PASSENGER

A lady was running to catch a train to Bangalore. She reached the station and was searching for the train.

Passenger: (Asked to the station master) Sir, is this my train?

Station Master: No Madam, this is not your train, it's railways department's train.

Passenger: (Annoyed) That's a good joke. Don't act too smart. What I meant was, can I take this train to Bangalore?

Station Master: No ma'am, you cannot! This train is so BIG and you can't take it.

Passenger: Its really funny! Now tell me, will this train take me to Bangalore?

Station Master: No ma'am. The train can't take you. The train driver will drive it to Bangalore!

The passenger fainted!

Poems on Coronavirus

Go corona go
You don't exist here
This is a new world for you
You can't take this world
On your head and hair
Go corona go!

There are many corona warriors
There are many immunities
You can't exist here
Ahh! If you do
Yeah! If you do

You will be beaten into fragments
And no one can let
You to go high
Go corona go!

Okay, If you think
Yeah! If you think
Doctors, Nurses, Police etc
All are against you
All are against you
Go corona go!
Go corona go!
You can do nothing here
Your place is in the lab...
With chemicals and jugs
You can do nothing here

There are several ways:
Sanitizers, Mask, Hand wash etc
To beat you up
You can't exist here
Go corona go!
Go corona go!

Go corona go
If, you think you have damaged
A lot of people
You can do nothing
All are against you
Go corona go!

Go corona go
You can do nothing
People are locked down
They're safe at home
They are staying up there
But you cannot stay here
Go corona go!
Go corona go!

GO CORONA GO

It travels faster than lightening speed,
Can infect even a king to bleed.
Its siblings are SARS and FLU,
Can harm your lungs and make blood blue.

It spreads by shaking hands,
Ebola and Influenza are it's grands.
To fight with it a little caution is needed,
It mostly affect grandparents and kids.
Government is taking many actions,

But the only thing we have to do is to keep ourselves in self isolation.

Ques1.When was Global emergency declared by world Health Organization?
A.11 February 2020
B.30 February 2020
C.31 December 2019
D.21 March 2020 .

Ques2. What is the another name for corona virus?
A. Covid-19
B. Covid
C. Coronavirindae
D. ConVid19

Ques3. Where was the first Novel corona virus case identified?
A. Beijing.
B. Wuhan ,Hubei
C. Shanghai
D. Tianjin

Ques4. How did corona virus get its name?
A. Due to their Crown-like projection.
B. Due to their leaf-like projection.
C. Due to their surface structure of bricks
D. None of the above.

Ques5. What are the symptoms for novel corona virus?
A. Fever
B. Cough
C. Shortness of breath
D. All of the above

Ques6. What are the precautions need to be taken to protect ourselves from corona virus?
A. Cover your nose and mouth while sneezing
B. Add more garlic and salt to your diet
C. Visit your doctor for antibiotics treatment
D. Wash your hands after every hour

Ques7 In which age group the COVID-19 spreads?
A. All age groups
B. Children
C. Older person
D. All of the above

Ques8 What do you mean by corona virus?
A. Family of viruses
B. Family of Naidovirus
C. Both A and B are correct
D. Only C is correct

Ques9 Which of the following disease is related to Corona virus?
A. MERS
B. SARS
C. Both A and B
D.Neither A nor B

Question 10 Which International clinical trial is launched by WHO and partners to help find an effective treatment for COVID-19?
A. Solidarity
B. Severance
C. Dissidents
D. Dissension

Importance of Yoga during lock down: The Science of the body and soul

As we all know that Yoga and other physical exercises are very important part of our life. Yoga helps to keep our body fit and refreshed. By just doing 15 minutes of yoga each day we can burn up to 100 calories from our body.

Yoga can also help us maintain the health of our mind and increase immunity. It does not only support our body physically and mentally, but it can also make a difference in how we feel and approach the rest of our day.

Now a days due to covid-19 virus, all people across the world have been locked up in their homes. All the countries that are effected by covid-19 virus, are maintaining social distancing to avoid the spread of this virus.

Due to lock down since 22nd March 2020 our movement and daily exercises have been restricted. We can't walk and run outside our home. If we give minimum 30 minutes for Yoga in morning time, we can achieve our goals for the rest of the day.

So to keep our body and mind refreshed, we should add 30 minutes of Yoga in our daily life.

STAY HEALTHY , STAY SAFE

BCS SUPPORTS

REMOTE LEARNING

TIPS FOR LEARNING FROM HOME

1.MAKE A PLAN

The school and your teacher will prepare your lessons, but it'll be good if you'll plan how you'll be studying at home.

2.TAKE NOTES

Write notes given by your teachers. Notes will help you remember lessons as you watch them. It'll also be useful for reviewing later.

3.KEEP YOUR ROUTINE

#Treat your day as if you're going to school.
#Get up early.
#Take a shower
#Take breakfast.
#Be ready to study

4.BE PROUD OF YOUR ACHIEVEMENTS

Studying at home isn't easy. Reward yourself for your small achievements.

5.TAKE A BREAK AND INVEST YOUR TIME IN YOUR HOBBY

Do your work in blocks to lessen the strain.
After finishing one lesson, take a break
Spend some time in your hobby.

Speak from the Heart

For the things we have to learn before
We can do them, we learn by doing them"

-Aristotle

On behalf of our team, we wanted to take this moment to say

THANK YOU.

Every day we are amazed by our community who use innovation, ideas, and services to create impact from the local to global level. We are inspired by them. Every time as we're empowered and comforted by the fact that how our students are evolving their talents at this situation. By releasing this edition of our e brochure, we get to fulfill our mission by delivering the message that we all have a voice and the power to make a difference at this time of pandemic and we all will make it through with each other's love and support.

We greatly thank you.

Happy Reading!
