BRILLIANTS' CONVENT

Class - X

Class 10

Theme : Portfolio Activities

English

Q1. Write biography of the poet Robert Frost in 100-120 words on A4 size sheet and paste his pictures.

Q2. Make a comic strip on A4 size sheets on any one of the following chapters

i) A Letter to God

ii) A Triumph Of Surgery

Q3. Write poem " A Tiger in the Zoo" on A 4 size sheet(neatly with pictures)

Q4. Revise all the work done in the class so far.

हिंदी

गतिविधि –1

नीचे दिए गए विषयों में से किसी एक विषय पर (120–150) शब्दों में एक लघु कथा लिखिए|

विषय –

1– करत करत अभ्यास के जड़मति होत सुजान

2– वीरता व देशभक्ति पर आधारित लघु कथा

गतिविधि –2

राजस्थान से संबंधित जानकारियों पर आधारित एक परियोजना कार्य तैयार कीजिए–

1– राजस्थान के चार प्रमुख पर्यटन स्थल के नाम

2– परंपरागत वेशभूषा

3– लोकगीत एवं संगीत

4– प्रमुख बोली

5– खान – पान
6– ऐतिहासिक किलों के नाम (कोई चार)

गतिविधि –3

पर्वतीय प्रदेशों की सामान्य जानकारियों पर आधारित एक कार्य प्रपत्र तैयार कीजिए, जिसमें निम्नलिखित जानकारी होना अनिवार्य है–

1– पर्यटन की दृष्टि से प्रसिद्ध तीन पर्वतीय स्थलों के नाम।
2– पर्वतीय प्रदेशों के प्राकृतिक सौंदर्य की दो विशेषताएं।
3– पहाड़ों में बोले जाने वाली दो बोलियों के नाम।
4– पर्वतीय प्रदेशों के घरों की विशेषताएं।
5– पर्वतीय प्रदेशों के लोगों की परंपरागत वेशभूषा।
6– पर्यावरण की विशिष्टता।

गतिविधि –4

"मीडिया का जनजीवन पर सकारात्मक व नकारात्मक प्रभाव" विषय से संबंधित एक अनुच्छेद लिखिए ।

Maths

Q1.Write down the formula for mean, median and mode for the grouped data giving 1 example for each.

Q2.Write all the conditions for the types of solutions in case of pair of linear equations in 2 variables giving 1 example of each and represent them on graph.

Q3. Revise all the work done in the class so far.

Science

Biology

Perform the following activity at home and record observation in the form of photograph and paste the photograph in the portfolio and also prepare one video while performing activity

Activity

Aim: Observing photosynthesis

Material List

- 1Bunch of Spinach Leaves
- 1/4Teaspoon Baking Soda
- 2Cups of Water
- 5Drops of Dish Soap
- 1Plastic Straw
- 1Syringe with no needle
- 1Measuring spoon
- 1Fork
- 1Desk lamp

Instructions

- Add ¼ teaspoon of baking soda and 5 drops of dish soap into 2 cups of water and stir.
- Use the straw to punch ten small discs from a spinach leaf and put them inside the empty syringe.
- Use the syringe to suck up some water then push out almost all of the air.
- Then block off the opening of the syringe with your thumb and gently pull the other end to remove tiny pockets of air from the leaves. Repeat this a few times until all the discs sink in the syringe liquid.
- Lastly, pour the leaf discs into the cup you prepared in step 1 and place it under the light (desk lamp).

- After a few minutes, the leaf discs will start to float.

How It Works

Plants carry out photosynthesis, the process of using sunlight to make sugar and oxygen from carbon dioxide and water. In this demonstration, the spinach leaf discs are doing exactly that -- combining carbon dioxide with water to make sugar and oxygen gas. The leaf discs float because of the oxygen gas being made. The syringe was used to remove air pockets in the spinach leaves to get them to sink in the first place.

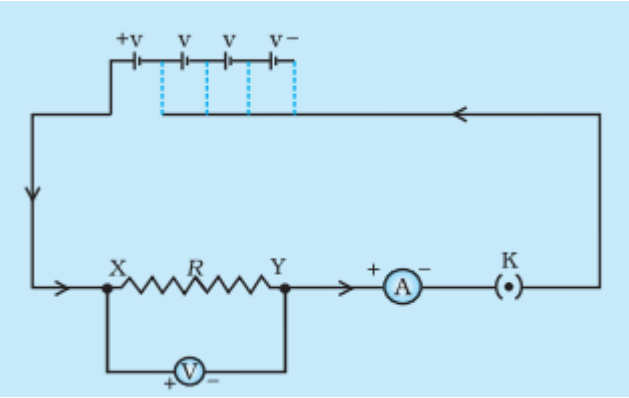

What you will learn

Plants carry out photosynthesis to make sugar from carbon dioxide and water.
In cellular respiration, living things use sugar to produce energy.
Matter cycles in an ecosystem through photosynthesis & cellular respiration

Physics

Activity 1-Study of ohms law

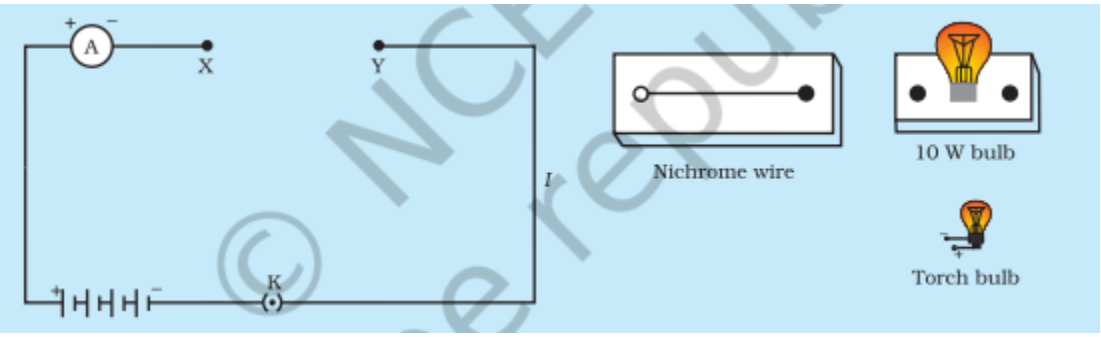

Set up a circuit as shown in Fig., consisting of a nichrome wire XY of length, say 0.5 m, an ammeter, a voltmeter and four cells of 1.5 V each. (Nichrome is an alloy of nickel, chromium, manganese, and iron metals.)

Activity 2

Take a nichrome wire, a torch bulb, a 10 W bulb and an ammeter (0 – 5 A range), a plug key and some connecting wires.

Set up the circuit by connecting four dry cells of 1.5 V each in series with the ammeter leaving a gap XY in the circuit, as shown in Fig

Complete the circuit by connecting the nichrome wire in the gap XY. Plug the key. Note down the ammeter reading. Take out the key from the plug. [Note: Always take out the key from the plug after measuring the current through the circuit.]

Replace the nichrome wire with the torch bulb in the circuit and find the current through it by measuring the reading of the ammeter.

Now repeat the above step with the 10 W bulb in the gap XY. n Are the ammeter readings different for different components connected in the gap XY? What do the above observations indicate?

You may repeat this Activity by keeping any material component in the gap. Observe the ammeter readings in each case. Analyse the observations.

Chemistry

Using turmeric, vanilla extract and onion extract as indicator categorize various substances at your home as acid and bases:

- Lemon juice
- Soap solution
- Salt solution
- Tamarind solution
- Tomato juice

SST

Q1. Make a tri fold brochure on the timeline of freedom struggle of India.

Q2. Parties are the main element of democracy. Make a party manifesto of your own with a party name and symbol.

Q3. Revise all the work done in the class so far .

COMPUTER

Q1. Make an IT application report file using HTML on the topic of your choice.
NOTE: You have to submit 3 HTML code pages and 3 browser views i.e. 6 pages in total (use all the tags and formatting effects covered in the syllabus)

Q2. Revise all the work done in the class till date.

Submit your homework on the mentioned ID with your Name Class and Subject in the subject line.
